

Veracity Data Systems is pleased to announce our Medicare Risk Adjustment Reporting Solution for Small Plans. For a small setup fee and a monthly per member fee, we will provide you with a set of reports that will provide you with a complete and accurate assessment of your Risk Adjustment efforts. These reports will provide you with the information you need to increase your risk scores with a targeted approach involving data submission, claims review, chart review, outreach, and vendor education.

How it Works

You provide us with your claims, vendor and CMS information, and we will generate reports and deliver them to your plan each month. Cost of the program is based on the number of members you have on your monthly MMR.

Medicare Risk Adjustment Reports

Our reports include:

- Year over year HCC reports
 - HCCs present in previous period submissions but not in current submissions
 - HCCs present in current submissions but not present in previous year submissions
- ICD-9 codes from claims which have not been submitted to CMS
- Members with no HCCs
- Vendor HCC analysis
- HCC comparisons to national averages.
- RAPS Return file analysis
 - Error Codes
 - Rejected records
 - Duplicate diagnostic clusters
 - Date of Service Breakdowns

We can provide a number of other reports to you, depending on the amount and type of data that you provide us. For the most complete reporting, we would need:

- Monthly Membership reports for at least two full calendar years for each plan.
- CMS Risk adjustment reports for each plan.
- Encounter data submissions and RAPS return files
- Production Claims data for at least one calendar year
- Vendor demographic data

Other Veracity Data Systems Offerings

Veracity Data Systems can provide your plan with other services for an additional fee:

CMS Risk Adjustment Software

We can also provide you with custom excel templates for analyzing the result files from your CMS Risk Adjustment software. We can also assist you in setting up input files for the software.

Consulting

We can supplement our Reporting offering with expert consulting services to help you craft a business process designed to maximize your Risk Adjustment Scores.
