

## HCC Year over Year Free Checkup

**Is your plan ready for your final 2008 Encounter Data submission? Let us help.**

The deadline for submitting 2008 Encounter Data to affect 2009 Risk Scores is January 31st, 2010. Has your plan identified and submitted all relevant diagnosis codes to CMS for your 2008 encounters?

Right now, Veracity Data Systems is offering a free year over year HCC analysis to help you identify HCCs that were submitted and accepted in previous years but not submitted in 2008, including an analysis of the financial impact of those HCCs.

Time is running out to identify and submit diagnosis codes that could mean additional 2009 revenue for your plan. Veracity Data Systems can help you identify opportunities for enhanced revenue.

Veracity Data Systems also offers a complete Risk Adjustment Scorecard that reviews your Risk Adjustment processes, and helps you identify process improvements, revenue enhancement opportunities, and Provider Education opportunities.

If you are interested in Veracity Data Systems free, no obligation year over year HCC report, contact us at [sales@veracitydatasystems.com](mailto:sales@veracitydatasystems.com) and provide your complete contact information, including your contract numbers and enrollment. We'll contact you and put you on the path to a better understanding of your Risk Adjustment Data.
